

TABE Reading Gains

Changes Hours:

- For students in an SJ facility, CHANGES hours (>176) increased TABE reading gains by nearly a grade level.

Title 1 Hours after CHANGES:

- Title 1 hours were not linearly related. Students that received no Title 1 hours had higher TABE reading gains than those taking 1 to 73 hours. However, students receiving more than 73 hours of Title 1 instruction exhibited nearly a half grade level increase in TABE reading gains over their peers.

Computer Lab:

- Students in SAFP and IS facilities demonstrated nearly a 1 grade level increase in TABE reading when given computer lab time.

Vocational and CHANGES hours:

- For students in an ID facility, TABE reading gains showed a linear relationship with computer hours.
- When large amounts of computer hours cannot be offered, vocational hours can help to bridge that gap and increase TABE reading gains by nearly 1 grade level.
